

# Protect, Preserve & Restore Your Native Canopy

## **BE PART OF THE SOLUTION!**

*Palm Beach County's rapid loss of native vegetation has human and ecological consequences for today... and the future.*

*When you retain native plants, you benefit yourself, your children, and the county's precious natural resources.*

## **Native Plants Can Benefit You by:**

- Increasing property values
- Decreasing utilities costs
- Reducing noise, water and air pollution
- Providing hurricane and weather resiliency
- Increasing opportunities for wildlife viewing

## **Native Plants Can Benefit Ecosystems by:**

- Providing food, shelter and nesting areas for wildlife
- Creating stop-over habitat for migrating animals
- Increasing connectivity between remnants of natural habitat
- Reducing overall demand on natural resources
