## PBC Building Division Continues to Rank Among the Best in the Nation *Superior Rating Means Lower Insurance Rates*

In the recent evaluation of the quality of building code enforcement activities by the Insurance Services Office (ISO), the Palm Beach County Building Division retained its superior rating of **2** on the Building Code Effectiveness Grading Schedule (BCEGS) for both residential and commercial permitting and inspection.

On a scale of 1-10, with 1 being the highest possible rating, the Building Division's rating puts it among the best in the nation. According to ISO data, of the more than 8,000 building departments surveyed in the United States, only about 190 earned an equivalent classification. Nationwide, there are only four departments with a higher residential ranking and nine with a higher commercial ranking than the Palm Beach County Building Division.

According to ISO's records, Palm Beach County received a rating of **4** in 1995, a rating of **3** in 1998, and a rating of **2** in 2009. Palm Beach County has retained this high standard since 2009.

This high ranking equates to lower insurance rates for residents of unincorporated Palm Beach County because current codes are efficiently and effectively being enforced by the Building Division's activities. ISO provides advisory insurance underwriting and rating information to insurers. For insurers who use the ISO rating program, credits may be applied to new construction projects that have been issued a certificate of occupancy subsequent to the ranking.
