

COMPREHENSIVE PLAN AMENDMENT STAFF REPORT AMENDMENT ROUND 20-A2

DEO TRANSMITTAL, FEBRUARY 5, 2020

A. Application Summary

I. General

Project Name:	Conservation Element and Map Updates (LGA 2020-009)
FLUA Summary:	RR-20 to CON
Text & Map Series Summary:	To amend the Comprehensive Plan to revise the Greenways & Linked Open Space Map, LU 8.1, add a new Conservation Lands Map LU 8.2, and to identify the new map in the Conservation Element.
Acres:	3.60 acres approximately
Location:	North of Indiantown Road, east of the Bee Line Highway
Project Manager:	Sussan Gash, Senior Planner
Applicant/Owner:	Palm Beach County
Staff Recommendation:	Staff recommends approval based upon the findings and conclusions contained within this report.

II. Assessment & Conclusion

This is a County initiated amendment to update the Comprehensive Plan at the request of the Department of Environmental Resources Management (ERM). Specific changes consist of:

- **Future Land Use Atlas Amendment.** The proposed amendment is to change the future land use designation on three County-owned parcels totaling 3.60 acres from Rural Residential, 1 unit per 20 acres (RR-20) to Conservation (CON). The parcels are located adjacent to the Pine Glades Natural Area located east of Bee Line Highway along the north side of Indiantown Road.
- **Text and Map Series Amendments.** The proposed text and map series amendment is to revise the Greenways and Linked Open Space System (GLOSS) Map series LU 8.1, to add a new map for Conservation Lands, and to revise Conservation Element to identify the new map.

The amendment complies with the requirement of Future land Use Element Policy 2.2.7-b which states that *“the County shall initiate amendments to designate environmentally sensitive lands purchased by the County as Conservation...”* by changing the future land use designation for the acquired parcels to Conservation. The amendment also complies with several goals, objectives and policies by helping to guarantee the appropriate use of lands with significant native vegetation, protect the natural functions of the native communities and ecosystems, ensure that representative communities remain intact and preserve greenway/wildlife corridors that link conservation areas. The proposed amendment is consistent with the Comprehensive Plan and compatible with surrounding land uses.

III. Hearing History

Local Planning Agency: *Approval*, motion by Dagmar Brahs, seconded by Angella Vann, passed in a 14 to 0 vote at the January 10, 2020 public hearing. There was minimal discussion and no public comment.

Board of County Commissioners Transmittal Public Hearing: *Transmit*, motion by Commissioner McKinlay, seconded by Vice Mayor Weinroth, passed in a 7 to 0 vote at the February 5, 2020 public hearing. There was minimal discussion and no public comment. One member of the public spoke in support.

State Review Agency Comments:

Board of County Commissioners Adoption Public Hearing:

B. Petition Summary

I. Site Data

Current Future Land Use

Current FLU: Rural Residential, 1 unit per 20 acres (RR-20)
Existing Land Use: Natural Area
Current Zoning: Agricultural Residential (AR)
Current Dev. Potential Max: Conservation (County-owned)

Proposed Future Land Use Change

Proposed FLU: Conservation (CON)
Proposed Use: Natural Area
Proposed Zoning: Agricultural Residential (AR)
Dev. Potential Max/Conditioned: Natural Area

General Area Information for Site

Tier/Tier Change: Rural Tier - No change
Utility Service: Palm Beach County Water Utilities Department
Overlay/Study: None
Annexation Area: None
Comm. District: Commissioner Hal R. Valeche, District 1

Future Land Use Atlas Amendment

Natural Areas (LGA 2020-009)

Site Data

Size: 3.60 acres
 Existing Use: Vacant
 Proposed Use: Natural Area
 Current FLU: Rural Residential, 1 unit per 20 acres
 Proposed FLU: Conservation

Future Land Use Designations

RR-20	Rural Residential, 1 unit per 20 acres
CON	Conservation
IND	Industrial

Date: 8/22/2019

C. Introduction & Review

I. Intent of the Amendment

This is a County initiated amendment to update the Comprehensive Plan at the request of the Department of Environmental Resources Management (ERM). Specific changes consist of:

- **Future Land Use Atlas Amendment.** The proposed amendment is to change the future land use designation on three County-owned parcels totaling 3.60 acres from Rural Residential, 1 unit per 20 acres (RR-20) to Conservation (CON). The parcels are located adjacent to the Pine Glades Natural Area located east of Bee Line Highway along the north side of Indiantown Road.
- **Text and Map Series Amendments.** The proposed text and map series amendment is to revise the Greenways and Linked Open Space System (GLOSS) Map series LU 8.1, to add a new map for Conservation Lands, and to revise Conservation Element to identify the new map.

Parcel Background: The parcels are located north of Indiantown Road, east of Bee Line Highway adjacent to the Pine Glades Natural Area. The general location and brief description of the parcels can be found in Exhibit 1, and a more detailed description of the parcels are found in Exhibit 4. The parcels are currently undeveloped land occupied primarily by native communities such as remnants of high-quality depression marsh, dome swamp, hydric hammock, mesic flatwoods, strand swamp, wet flatwoods, and wet prairie communities. They also are part of an important wildlife corridor designed to connect the J.W. Corbett Wildlife Management Area with the Pratt Whitney Complex and to other publicly-owned conservation areas in the area. There is no associated zoning petition.

The County, through its Department of Environmental Resources Management, has acquired these parcels for the purposes of environmental preservation, restoration and conservation. Acquisition and management of the lands will preserve the existing biological diversity, including the endangered, threatened and rare species of plants and animals that live within the parcels. The County, through its Department of Environmental Resources Management, acquired title to the subject parcels through the tax deed process between May and June 2019. Costs related to the acquisition of these parcels were paid from the County's Natural Areas Fund. The parcels are available to the public for recreational, environmental education and scientific research activities that do not adversely affect the environmentally sensitive nature of these areas. The boundaries of Conservation Lands will be updated on the GLOSS map and within the new Conservation Lands Map Series to reflect the addition of these lands with the Conservation Future Land Use designation.

II. Data and Analysis Summary

This section of the report summarizes the consistency of the amendment with the County's Comprehensive Plan. Exhibit 3 details the consistency of the amendment with Plan policies, including justification, compatibility, public facilities impacts, intergovernmental coordination, and consistency with specific overlays and plans. The substantive factors from Exhibit 3 are summarized below.

A. Proposed Amendment

This amendment proposes to amend the Future Land Use for 3.60 acres consisting of 3 parcels from RR-10 to Conservation (CON), to amend the Greenways and Linked Open Space System (GLOSS) Map series LU 8.1 to update the boundaries of the conservation lands and introduce a new map series called Conservation Lands LU 8.2. The addition of lands to the Conservation Land Use is part of an ongoing program to save native communities and ecosystems as required by the Comprehensive Plan. The changes to the map series graphically represents those efforts. The Greenways and Linked Open Space Map Series System LU 8.1 depicts the interconnected links between Conservation and Open Space Lands throughout the County. These tracts consist of City and County Parks, South Florida Water Management District lands, other State and Federal lands, and County and Municipal owned Conservation lands. The changes will update the boundaries of lands with a Conservation Future Land Use designation, as acquisitions have occurred since the last update in 2015.

The amendment also proposes to add a new map to the Map Series highlighting only conservation lands. The newly proposed map called "Conservation Lands Map LU 8.2" will identify only those lands with a Conservation Future Land Use designation (CON), with color coding to further separate the lands by government ownership. The amendment includes text changes to the Conservation Element to recognize the new map and to revise references.

B. Appropriateness of the Amendment

The proposed future land use amendment supports and is consistent with several Comprehensive Plan policies including:

- Conservation Element Goal 2, "Protection of Native Communities and Ecosystems" which states that is it the County's goal *"...to conserve, appropriately use, and protect the natural functions of native communities and ecosystems."*
- Conservation Element Objective 2.1, which directs the County to *"...preserve and protect native communities and ecosystems to ensure that representative communities remain intact..."*, with priority given to lands with significant native vegetation.
- Conservation Element Policy 2.2-f, which requires the County to *"support wetland creation, restoration, enhancement, and preservation"*. The subject parcels contain environmentally significant wetland and upland habitats which benefit and support the surrounding wetland ecosystems throughout this area of the County.
- Conservation Element Policy 2.3-b regarding the Loxahatchee Slough and River Corridor, which requires the County to *"continue to designate as Conservation on the County's Land Use Plan Map any acquired conservation areas within the area defined as the "Corridor" by the South Florida Water Management District, as well as all slough and river natural areas acquired or managed by the County"*. This will further Policy 2.3-f to re-establish the historic hydrologic connections within the Loxahatchee River watershed.

The proposed map series amendments support and are consistent with several Comprehensive Plan policies including:

- Conservation Element Goal 5, "Linked Open Space Network - Conservation Greenways/Wildlife Corridors" as shown on the updated Green ways and Linked Open Space Systems Map (GLOSS) and its associated Objective and Policies.
- Conservation Element Objective 5.1 which directs the County to create Conservation Greenway/Wildlife Corridors that links Conservation Areas and lands with significant native vegetation. The update of the conservation lands boundaries on the GLOSS map, and the introduction of a new Conservation Lands to the Map Series, will accurately reflect the ongoing efforts of multiple agencies, including the County, to acquire, designate, preserve and manage Conservation Lands, including conservation Greenway/Wildlife Corridors throughout the County. The links connect areas with uses that may include such passive human recreational uses as hiking, biking, bird watching and other passive recreation uses when such uses will not jeopardize environmental resources.
- The depiction of recently acquired conservation lands on the updated GLOSS map and creation of a new Conservation Lands Map furthers Future Land Use Element Policy 2.2.7-b which *"Requires the County to initiate amendments to designate environmentally sensitive land purchased by the County as Conservation"*. The Conservation Future Land Use designation will accurately reflect the use of these sites as county-owned Conservation lands. The addition of a new Conservation Lands map will provide a singular picture of the Conservation lands owned by the County and their proximity to other Government owned lands also held in conservation.
- The Conservation Element is a required element per Florida Statute (F.S.) 163.3177(6)(d), Subsection F.S.163.3177(2), further states that each required Element should contain a "map depicting future conditions must reflect the principals, guidelines, and standards within all Elements, and each such map must be contained within the Comprehensive Plan." A specific Conservation Lands map identifying lands defined under the Conservation Element will further both the intent of the state statutes and the goals of the Element.

Assessment and Recommendation. The amendment complies with the requirement of Future Land Use Element Policy 2.2.7-b which states that *"the County shall initiate amendments to designate environmentally sensitive lands purchased by the County as Conservation..."* and will reflect the County's purchase of environmentally sensitive parcels by changing the Future Land use designation to Conservation and updating the depiction of County-owned Conservation Lands within the Map Series. This land use change will guarantee the appropriate use of lands with significant native vegetation, protect the natural functions of the native communities and ecosystems, ensure that representative communities remain intact and help to create conservation greenway/wildlife corridors that will link conservation areas. The proposed amendment is consistent with the Comprehensive Plan and compatible with surrounding land uses.

Staff recommends **approval** based upon the findings within this report.

Text & Map Series Amendments

A. Conservation Element, Conservation Updates

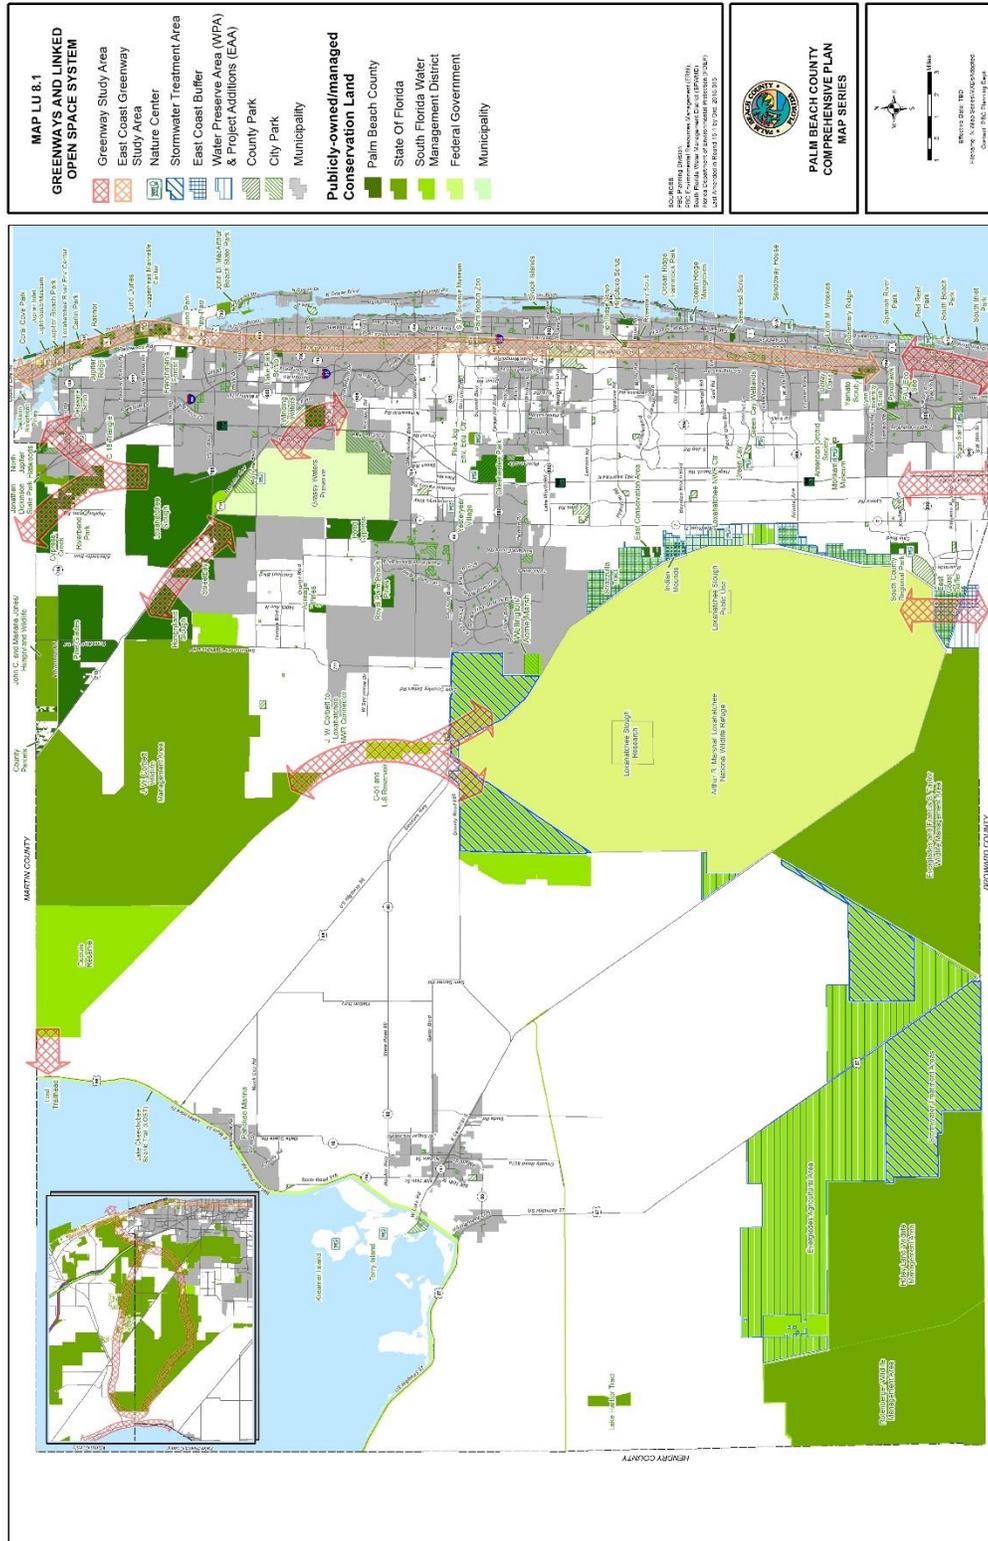

REVISIONS: To add references to the new map Conservation Lands LU 8.2. The revisions are numbered below, and shown with the added text underlined.

1. **REVISE Policy 5.1-a:** Conservation Lands and Greenways/Wildlife Corridors are identified on the maps s entitled "Conservation Lands" map and "Greenways and Linked Open Space System" and shall be recognized as a part of the overall land use pattern of the Palm Beach County Comprehensive Plan. The corridors, which were identified with the expert assistance of local, state, and federal agencies and with public input, shall be protected during the Land Development process to the maximum extent feasible when such protection does not result in a taking of private property or an inordinate burden to private property pursuant to the Burt J. Harris, Jr., Private Property Rights Protection Act. *Cross reference: ROSE Policy 1.4-f.*

2. **REVISE Policy 5.1-b:** The County in concert with other jurisdictions shall continue to identify those portions of Conservation lands and Greenways/Wildlife Corridors which should be acquired, and shall jointly continue to seek grant funds, negotiate life estates, conservation easements, transfer of development rights, land exchanges or fee simple acquisition if necessary to preserve vital portions of wildlife corridors. *Cross reference: ROSE Policy 1.4-a.*

B. Map Series, Conservation Updates

REVISIONS: To update the GLOSS Map LU 8.1. Newly Proposed Map:

C. Map Series, Conservation Updates

REVISIONS: To add new Conservation Lands Map LU 8.2. Newly Proposed Map:

Exhibit 3

Consistency with Comprehensive Plan

This Exhibit examines the consistency of the amendment with the County's Comprehensive Plan, Tier Requirements, applicable Neighborhood or Special Area Plans, and the impacts on public facilities and services.

A. Consistency with the Comprehensive Plan - General

1. **Justification: FLUE Policy 2.1-f:** This policy states that *“Before approval of a future land use amendment, the applicant shall provide an adequate justification for the proposed future land use and for residential density increases demonstrate that the current land use is inappropriate. In addition, and the County shall review and make a determination that the proposed future land use is compatible with existing and planned development in the immediate vicinity and shall evaluate its impacts on:*

1. *The natural environment, including topography, soils and other natural resources; (see Public Facilities Section)*
2. *The availability of facilities and services; (see Public Facilities Section)*
3. *The adjacent and surrounding development; (see Compatibility Section)*
4. *The future land use balance;*
5. *The prevention of urban sprawl as defined by 163.3164(51), F.S.;*
6. *Community Plans and/or Planning Area Special Studies recognized by the Board of County Commissioners; and (see Neighborhood Plans and Overlays Section)*
7. *Municipalities in accordance with Intergovernmental Coordination Element Objective 1.1. (see Public and Municipal Review Section)*

Staff Analysis: This policy is the umbrella policy over the entire amendment analysis and many of the items are addressed specifically elsewhere in this report as identified above. This amendment is proposed to reflect the County's purchase of the property for conservation purposes, updates the existing map series and presents a new map series and, therefore, has met the justification requirements.

2. **County Directions – FLUE Policy 2.1-g:** *The County shall use the County Directions in the Introduction of the Future Land Use Element to guide decisions to update the Future Land Use Atlas, provide for a distribution of future land uses in the unincorporated area that will accommodate the future population of Palm Beach County, and provide an adequate amount of conveniently located facilities and services while maintaining the diversity of lifestyles in the County.*

1. **Livable Communities.** *Promote the enhancement, creation, and maintenance of livable communities throughout Palm Beach County, recognizing the unique and diverse characteristics of each community. Important elements for a livable community include a balance of land uses and organized open space, preservation of natural features, incorporation of distinct community design elements unique to a given region, personal security, provision of services and alternative transportation modes at levels appropriate to the character of the community, and opportunities for education, employment, health facilities, active and passive recreation, and cultural enrichment.*

2. **Growth Management.** *Provide for sustainable communities and lifestyle choices by: (a) directing the location, type, intensity, timing and phasing, and form of development that respects the characteristics of a particular geographical area; (b) requiring the transfer of development rights as the method for most density increases; (c) ensuring smart growth, by protecting natural resources, preventing urban sprawl, providing for the efficient use of land, balancing land uses; and, (d) providing for facilities and services in a cost efficient timely manner.*

10. **Linear Open Space and Park Systems.** *Enhance the appearance of the County by providing an open space network that will become a visual and functional organizer of recreational activities, natural resources and other open space areas. This should include public lands, passive as well as active recreation areas, beaches and conservation areas.*

12. **Environmental Integrity.** *Encourage restoration and protection of viable, native ecosystems and endangered and threatened wildlife by limiting the impacts of growth on those systems; direct incompatible growth away from them; encourage environmentally sound land use planning and development and recognize the carrying capacity and/or limits of stress upon these fragile areas.*

Staff Analysis: This amendment fosters the preservation of natural areas through the assignment of the Conservation future land use designation, updates and creates new map series to illustrate these efforts and furthers the above referenced directions.

B. Consistency with Urban/Suburban Tier Requirements for the Specific FLU

Future Land Use Element Objective 1.1, Managed Growth Tier System, states that “*Palm Beach County shall implement the Managed Growth Tier System strategies to protect viable existing neighborhoods and communities and to direct the location and timing of future development within 5 geographically specific Tiers.....*”

1. **Future Land Use Element, Policy 1.2-a:** *Within the Urban/Suburban Tier, Palm Beach County shall protect the character of its urban and suburban communities by:*
 1. *Allowing services and facilities consistent with the needs of urban and suburban development;*
 2. *Providing for affordable housing and employment opportunities;*
 3. *Providing for open space and recreational opportunities;*
 4. *Protecting historic, and cultural resources;*
 5. *Preserving and enhancing natural resources and environmental systems; and,*
 6. *Ensuring development is compatible with the scale, mass, intensity of use, height, and character of urban or suburban communities.*

Staff Analysis: This amendment reflects the identification, preservation and enhancement of natural resources and environmental systems, and provides open space and recreational opportunities; it is therefore consistent with this policy.

2. **Future Land Use Element, Policy 2.2.7-b:** *The County shall initiate amendments to designate environmentally sensitive lands purchased by the County as Conservation. The County shall also coordinate with municipalities to designate County acquired environmentally sensitive lands within incorporated areas as Conservation.*

Staff Analysis: This amendment is consistent with and mandated by Future Land Use Element Policy 2.2.7-b and will accurately reflect the use of these sites as county-owned Conservation lands.

- 3. Conservation Element Goal 2, “Protection of Native Communities and Ecosystems”** and the Conservation Element, Objective 2.1, which directs the County to “...preserve and protect native communities and ecosystems to ensure that representative communities remain intact. Priority shall be given to lands with significant native vegetation.”

Staff Analysis: The proposed amendment is consistent with the stated goal and objective which direct the County to conserve/preserve and protect native communities and ecosystems for public benefit.

- 4. Conservation Element Policy 2.2-f**, which directs the County to “*support wetland creation, restoration, enhancement, and preservation...*”.

Staff Analysis: Acquisition and preservation of the subject parcels, which contain environmentally sensitive wetland and upland habitats, is consistent with this policy.

- 5. Conservation Element, Goal 5 (Linked Open Space Network - Conservation Greenways/Wildlife Corridors), Objective 5.1 (Greenways and Corridors)** and its associated policies.

Staff Analysis: The acquisition and preservation of three additional county-owned conservation lands and modification of the Future Land Use designation on those parcels to Conservation will support Conservation Element Objective 5.1. This objective directs the County to “...create Conservation Greenway/Wildlife Corridors linking Conservation Areas and lands with significant native vegetation...”. The recently acquired parcels will help support nearby natural areas/conservation areas, along with the listed species that utilize those areas. The parcels, in combination with other publicly-owned conservation lands, will be managed as part of a linked open space network to assure the survival of species that would be jeopardized by isolation. The proposed amendment to update the Greenways and Linked Open Space Map series LU 8.1 and create a new Conservation Lands Map series LU 8.2 is consistent with, and furthers statutory requirements and several Goals, Objectives and Policies of the Conservation Element.

- 6. Future Land Use Element OBJECTIVE 5.6** The Greenways and Linked Open Space System (GLOSS) Objective contains policies that identify and encourage the creation of an interconnected system of trails, natural/Conservation areas and multipurpose open spaces that will bridge designated conservation lands with recreational opportunities and other publicly owned open spaces via the continued acquisition of lands and intergovernmental coordination.

Staff Analysis: The proposed amendment will update Map LU 8.1 to illustrate the addition of conservation lands and show the current status of conservation lands within the County and how they fit within the Greenways and Linked Open Space System. A new Conservation Lands map, Map LU 8.2, shows only those land with the Conservation Future Land Use designation (CON).

C. Compatibility

The County-owned properties within the amendment are adjacent to, or near, other County and other Government owned conservation lands within the Loxahatchee River Watershed and Pine Glades Natural area system, which will be retained as natural lands and, therefore, there are no compatibility issues with this amendment.

D. Consistency with County Overlays, Plans, and Studies

1. **Overlays** – FLUE Policy 2.1-k states *“Palm Beach County shall utilize a series of overlays to implement more focused policies that address specific issues within unique identified areas as depicted on the Special Planning Areas Map in the Map Series.”*

Staff Analysis: The subject request is not located within any neighborhood plans, overlays or plan study areas as identified in the Comprehensive Plan.

2. **Neighborhood Plans and Studies** – FLUE Policy 4.1-c states *“The County shall consider the objectives and recommendations of all Community and Neighborhood Plans, including Planning Area Special Studies, recognized by the Board of County Commissioners, prior to the extension of utilities or services, approval of a land use amendment, or issuance of a development order for a rezoning, conditional use or Development Review Officer approval.....”*

Staff Analysis: The subject site is not located within the boundaries of a Neighborhood Plan or Planning Area Special Study.

E. Public Facilities and Services Impacts

The County-owned property within the amendment site will be retained as conservation lands, therefore, there will be no impacts to public facilities and/or services.

F. Public and Municipal Review

The Comprehensive Plan Intergovernmental Coordination Element **Policy 1.1-c** states that *“Palm Beach County will continue to ensure coordination between the County’s Comprehensive Plan and plan amendments and land use decisions with the existing plans of adjacent governments and governmental entities.....”*

1. **Intergovernmental Coordination:** Notification was sent to the County’s Intergovernmental Plan Amendment Review Committee (IPARC), a clearing-house for plan amendments, on November 22, 2019. At the time of the printing of this report, no calls or written requests for information or objections to the amendment have been received.
2. **Other Notice:** At the time of the printing of this report no comments have been received from other interested groups, or members of the public.

Exhibit 4

Natural Area Description

Low-lying upland, transitional and freshwater wetland parcels north of Indiantown Road and County's Pine Glades Natural Area, northeast of Beeline Highway (SR 710) and west of the State of Florida's John C. and Mariana Jones/ Hungryland Wildlife and Environmental Area.

This amendment will change the Future Land Use designation on three parcels (3.60 acres) located north of Indiantown Road and Pine Glades Natural Area, and east of Beeline Highway (SR 710) from Rural Residential, 1 unit per 20 acres (RR-20), to Conservation (CON). The subject parcels are located in an area known as the Palm Beach Heights portion of Palm Beach County (County).

The subject parcels do not meet current land development regulations and therefore are not buildable. See April 2017 report and June 2005 White Paper:

www.pbcgov.org/erm/Publications/2017Report-LackofDevelopmentPotentialPalmBeachHeightsParcels.pdf

www.pbcgov.org/erm/Publications/2005PalMarWhitePaper.pdf

The parcels are considered the product of an illegal subdivision. Unlike some of the Jupiter Farms areas, the owners of the Palm Beach Heights area failed to apply for and obtain an Affidavit of Exemption which could have exempted the area from the subdivision rule. As a result, they cannot meet the requirements listed under Zoning's Potentially Buildable Lot Review.

Acquisition of the Palm Beach Heights/Pine Glades Natural Area Addition: The County, through its Department of Environmental Resources Management, acquired title to the subject parcels through the tax deed process between May and June 2019. Costs related to the acquisition of these parcels were paid from the County's Natural Areas Fund. The purpose of these acquisitions was to help reduce the number of nongovernment-owned parcels within an area that does not conform with County land development regulations, preserve high-quality freshwater wetland, transitional and low lying upland habitats, preserve one of the most significant ("42 to 60") aquifer recharge areas in the County (see MAP UT 1.1, Palm Beach County Comprehensive Plan), preserve freshwater flows to the Northwest Fork of the Loxahatchee River (a Nationally-designated Wild and Scenic River), and eventually create a wildlife and greenway corridor that would connect conservation lands within Pratt Whitney complex and J.W. Corbett Wildlife Management Area, to conservation lands within the John C. and Mariana Jones/Hungryland Wildlife and Environmental Area. The County manages the subject parcels as part of the nearby Pine Glades Natural Area.
